I. Earned degrees

Ph.D.	2008	Massachusetts Institute of Technology	Computer Science
M.S.	2002	University of Southern California	Computer Science
B.S.	1999	Stanford University	Philosophy

II. Professional Employment History

Associate Professor with tenure	Courant Institute and Center for Data Science	2019-
	New York University	
Visiting Research Scientist	Facebook Artificial Intelligence Research	2018-
Associate Professor with tenure	School of Interactive Computing	2018-2019
	Georgia Institute of Technology	
Assistant Professor	School of Interactive Computing	2012-2018
	Georgia Institute of Technology	
Postdoctoral Scholar	Machine Learning Department	2009-2011
	Carnegie Mellon University	
Postdoctoral Fellow	Beckman Institute	2008-2009
	University of Illinois	

III. Honors and Awards

A. International or National Awards

- 1. **Best Student Paper Award**, with Vinodh Krishnan, 2015. North American Association for Computational Linguistics. Awarded for our paper "You're Mr. Lebowski, I'm The Dude": Inducing address term formality in signed social networks.
- 2. NSF Career Award, 2015. Awarded for the proposal "Sociolinguistic Structure Induction."
- 3. **SICSA Distinguished Visiting Fellow**. Scotland, 2013. Awarded by the Scottish Informatics & Computer Science Alliance, to support collaborative research and presentations in Scotland.
- 4. **Best Presentation Award**. NAACL Workshop on Computational Linguistics in a World of Social Media, 2010. Awarded for the presentation of "Social Links from Latent Topics in Microblogs."

B. Institute or School Awards

- 1. **James D. Lester III Family Award** for internet research, 2016. Awarded by the College of Computing at the Georgia Institute of Technology.
- 2. **Class of 1940 Course Survey Teaching Effectiveness Award**. Georgia Tech, Spring 2013. Awarded for outstanding teaching evaluations in CS 7650, Natural Language Understanding.
- 3. **George M. Sprowls Award**. MIT, 2009. Awarded for the best doctoral theses in Computer Science.

Jacob Eisenstein Page 3 of 23

IV. Research and Creative Scholarship

Following Georgia Tech's preferred formatting conventions, asterisks indicate publications written while at Georgia Tech, and boldface is used to indicate student advisees. This includes Georgia Tech undergraduate and graduate students, as well as visiting PhD students Dong Nguyen and Caglar Tirkaz. Students at other universities are not highlighted.

A. Published Books, Parts of Books, and Edited Volumes

A.1. Books

[1] * Jacob Eisenstein. Natural Language Processing. MIT Press, 2019.

A.2. Other Parts of Books: Invited Chapters

- [1] * Jacob Eisenstein. Written dialect variation in online social media. In Charles Boberg, John Nerbonne, and Dom Watt, editors, *Handbook of Dialectology*. Wiley, 2017.
- [2] Angel Puerta and Jacob Eisenstein. Developing a multiple user interface framework for industry. In A. Seffah and H. Javahery, editors, *Multiple User Interfaces: Engineering and Application Frameworks*. John Wiley and Sons, 2003.

B. Refereed Publications and Submitted Articles

B.1. Published and Accepted Journal Articles

- [1] *Scott F. Kiesling, **Umashanthi Pavalanathan**, Jim Fitzpatrick, **Xiaochuang Han**, and Jacob Eisenstein. Interactional stancetaking in online forums. *Computational Linguistics*, 44(4), 2018.
- [2] * **Dong Nguyen** and Jacob Eisenstein. A kernel independence test for geographical language variation. *Computational Linguistics*, 43, 2017.
- [3] * Yi Yang and Jacob Eisenstein. Overcoming language variation in sentiment analysis with social attention. *Transactions of the Association for Computational Linguistics (TACL)*, 5, 2017.
- [4] * Umashanthi Pavalanathan and Jacob Eisenstein. More emojis, less:) The competition for paralinguistic functions in microblog writing. *First Monday*, 22(11), November 2016.
- [5] * Lauren F. Klein, Jacob Eisenstein and **Iris Sun**. Exploratory thematic analysis for digitized archival collections. *Digital Scholarship in the Humanities*, October 2015.
- [6] * Caglar Tirkaz, Jacob Eisenstein, T. Metin Sezgin and Berrin Yanikoglu. Identifying visual attributes for object recognition from text and taxonomy. *Computer Vision and Image Understanding*, 2015.
- [7] * Umashanthi Pavalanathan and Jacob Eisenstein. Audience-modulated variation in online social media. *American Speech*, 90(2), May 2015.
- [8] * Jacob Eisenstein. Systematic patterning in phonologically-motivated orthographic variation. *Journal of Sociolinguistics*, 19:161–188, 2015.
- [9] * Yangfeng Ji and Jacob Eisenstein. One vector is not enough: Entity-augmented distributional semantics for discourse relations. *Transactions of the Association for Computational Linguistics (TACL)*, 2015.
- [10] * Jacob Eisenstein, Brendan O'Connor, Noah A. Smith and Eric P. Xing. Diffusion of lexical change in social media. *PLoS ONE*, 9, November 2014.

Jacob Eisenstein Page 4 of 23

D. Presentations

D.1. Keynote Addresses and Plenary Lectures

This section includes presentations that were invited at venues that also had peer-reviewed presentations. Presentations at venues where every talk was invited are listed under "Invited Conference and Workshop Presentations."

- D.1.1 NAACL Workshop on Subword and Character Level Models in NLP, New Orleans, June 2018. "Orthographic Social Variation in Online Writing."
- D.1.2 ACL Workshop on Representation Learning for NLP, Vancouver, August 2017. "Learning Sociolinguistic Representations."
- D.1.3 Workshop on Data-Driven Approaches to Networks and Language, Lyon, May 2016. "Computational Models of Language Change in Online Social Media."
- D.1.4 DiSpoL 2015: Identification and Annotation of Discourse Relations in Spoken Language, Saarbrücken, October 2015. "Automatic Identification of Discourse Relations from Distributed Representations."
- D.1.5 EMNLP Workshop on Linking Models of Lexical, Sentential and Discourse-level Semantics, Lisbon, September 2015. "From Distributed Semantics to Discourse, and Back."
- D.1.6 SocialNLP workshop at the North American Assocation for Computational Linguistics, Denver, June 2015. "Variation and change in social media language."
- D.1.7 NIPS Workshop on Modern Machine Learning and Natural Language Processing, Montreal, December 2014. "Representation learning for discourse parsing."
- D.1.8 Methods in Dialectology XV, Groningen, 2014. "Dialect variation in online social media."
- D.1.9 *IEEE Workshop on Interactive Visual Text Analytics*, Atlanta, 2013. "Understanding language variation in social media."
- D.1.10 Symposium about Language and Society (SALSA), Austin, 2013. "Large-scale analysis of language variation and change in social media."

D.2. Invited Conference and Workshop Presentations

- D.2.1 Bridging disciplines in analysing text as social and cultural data, Turing Institute (London), September 2017
- D.2.2 Symposium on Text as Social and Cultural Data, University of Twente (Enschede, Netherlands), March 2017
- D.2.3 Linguistic Society of America Workshop on Preparing Your Corpus for Archival Storage, Wahsington D.C., January 2016
- D.2.4 American Association for the Advancement of Science, Annual Meeting, February 2015
- D.2.5 Stanford Conference on Computational Social Science, April 2014
- D.2.6 Conference on Patterns of Macro- and Micro-Diversity in the Languages of Europe and the Middle East. Computational Issues in Studying Language Diversity: Storage, Analysis and Inference. Groningen, Netherlands, July 2013
- D.2.7 Workshop on Big Data and Language Technology, Copenhagen, Denmark, May 2013

Jacob Eisenstein Page 11 of 23

D.3. Conference and Workshop Presentations

The following presentations were accepted based on a peer-reviewed abstract submission. Presentations associated with published conference papers are listed above in section B, and not here.

- D.3.1 "#thighgap to #thyghgapp: Incrementation of orthographic variation on Instagram," presented by **Ian Stewart** at *Diversity and Variation in Language*, Atlanta, February 2017.
- D.3.2 "Stance markers, Reddit thread structure, and community," presented by **Umashanthi Pavalanathan** at *New Ways of Analyzing Variation*, Vancouver, November 2016.
- D.3.3 "A Nonparametric Test for Spatial Dependence," presented by **Dong Nguyen** at *New Ways of Analyzing Variation*, Toronto, October 2015.
- D.3.4 "Rhetorical Patterns in Congressional Floor Speeches," presented at *New Directions in Text as Data*, NYU, October 2015.
- D.3.5 "Reading Thomas Jefferson with TopicViz: Towards a Thematic Method for Exploring Large Cultural Archives," presented (with Lauren Klein) at Research Foundations for Understanding Books and Reading in the Digital Age: E/Merging Reading, Writing, and Research Practices, Havana, December 2012.
- D.3.6 "Mapping the Spread of New Words in Social Media." NIPS Workshop on Social Network and Social Media Analysis, Lake Tahoe, CA, December 2012.
- D.3.7 "Statistical Exploration of Geographical Lexical Variation in Social Media" at *Meeting of the Linguistic Society of America*, Pittsburgh, January 2011.

D.4. Invited Seminar Presentations

Since beginning at Georgia Tech in 2012.

- D.4.1 New York University, April 2018
- D.4.2 University of Washington, Feb 2018
- D.4.3 University of Colorado, June 2017
- D.4.4 Georgetown University Linguistics Series, April 2017
- D.4.5 Language Technology Institute (LTI) Seminar, Carnegie Mellon University, December 2016
- D.4.6 Xerox Research Center Europe, Grenoble, May 2016
- D.4.7 University of Toulouse, May 2016
- D.4.8 École Normale Supérieure de Lyon, May 2016
- D.4.9 Text-as-data speaker series, New York University, February 2016
- D.4.10 Social Science Data Analytics Series, Michigan State University, January 2016
- D.4.11 IGERT Distinguished Speaker Series, Columbia University, November 2015
- D.4.12 University of Copenhagen, October 2015
- D.4.13 Digital Humanities Day at the University of Georgia, April 2015
- D.4.14 Stanford Linguistics Colloquium, February 2015

Jacob Eisenstein Page 12 of 23

- D.4.15 Google New York, July 2014
- D.4.16 Facebook Research, April 2014
- D.4.17 University of Alabama at Birmingham, December 2013
- D.4.18 University of Washington, October 2013
- D.4.19 SICSA Distinguished Visiting Fellow Lectures: Universities of Edinburgh, Glasgow, and Saint Andrews, July 2013.
- D.4.20 University of Texas, May 2012
- D.4.21 University of Maryland CLIP colloquium, May 2012
- D.4.22 Emory University Math and Computer Science seminar, May 2012
- D.4.23 Columbia University, March 2012

D.5. Other Presentations

- D.5.1 MLConf (The Machine Learning Conference), Atlanta, September 2017.
- D.5.2 Lisbon Machine Learning Summer School, July 2012.

E. Grants and Contracts

1. CAREER: Sociolinguistic Structure Induction

Sponsor: National Science Foundation Amount and role: \$499,995, Sole PI

Period of award: 2015-2020

2. Social Media Signals for Post-traumatic Stress and Anxiety in Crisis-Inflicted Communities

Sponsor: National Institutes of Health

Amount and role: \$1,448,921, Senior/Key personnel (Funding share: 40%)

Collaborators: Munmun De Choudhury (PI), James Pennebaker (Senior/Key personnel, Univer-

sity of Texas)

Period of award: 2015-2020

3. Hybrid distributional-entity semantics for discourse relations

Sponsor: Google Faculty Research Award

Amount and role: \$57,191, Sole PI

Period of award: 2015-2016

4. Expanding Lexical Resources with Knowledge Elicitation and representation Learning to Improve Automated Detection and Classification of WMD Events in Text

Sponsor: Defense Threat Reduction Agency

Amount and role: \$310,000, Co-PI (Funding share: 80%)

Collaborators: Bryan Lee (PI; Monterey Institute for International Studies) and Erica Briscoe (Co-

PI; Georgia Tech Research Institute)

Period of award: 2014-2017

5. Tracing Reuse in Political Language

Sponsor: Google Computational Journalism Research Awards

Amount and role: \$60,000, Co-PI (Funded share: two semester GRA)

Collaborators: Irfan Essa (PI) and Eric Gilbert (Co-PI)

Period of award: 2014-2015

Jacob Eisenstein Page 13 of 23

6. Socio-digital influence networks from language analysis

Sponsor: Air Force Office of Scientific Research, Young Investigator Research Program

Amount and role: \$360,000, Sole PI

Period of award: 2014-2017

7. EAGER: Exploring Adapting Language Technology Across a Network of Domains

Sponsor: National Science Foundation Amount and role: \$100,000, Sole PI

Period of award: 2013-2015

8. TOME: Interactive TOpic Model and MEtadata Visualization

Sponsor: National Endowment for the Humanities

Amount and role: \$59,999, Co-Projector Director (Funding share: 50%)

Collaborator: Lauren Klein (Project Director)

Period of award: 2013-2015

9. Latent discourse trees

Sponsor: Google Faculty Research Award

Amount and role: \$50,500, Sole PI Period of award: 2012-2013

10. Collaborative Research: Discovering and Exploiting Latent Communities in Social Media

Sponsor: National Science Foundation

Amount and role: \$547,805, Co-PI (Funding share: \$80,000 subcontract to Georgia Tech after join-

ing faculty)

Collaborators: Eric P. Xing (PI) and Scott F. Kiesling (Co-PI)

Period of award: 2011-2015

F. Other Scholarly Accomplishments

Senior team member for **Wide-band Machine Translation** at the Frederick Jelinek Memorial Summer Workshop on language technology, July-August 2015. The team was selected for funding among many other proposals at an interactive peer review meeting in Baltimore in November 2014.

G. Societal And Policy Impacts

My research on computational linguistic analysis of social media has been featured in a number of mass media venues, including both print (New York Times, Time Magazine, the Wall Street Journal, the Washington Post, the Boston Globe) and radio (National Public Radio programs *All Things Considered* and *Here & Now*, the BBC program *Click*).

H. Other Professional Activities

Consultant for Microsoft Research NYC (2014), and for the Public Defender Service of the District of Columbia (2018).

Jacob Eisenstein Page 14 of 23

V. Teaching

B. Individual Student Guidance

B.1. Ph.D. Students

B.1.a Graduated

Yangfeng Ji Computer Science

Fall 2012 – Summer 2016; was previously in ECE Doctoral Program

Assistant Professor at University of Virginia

Dissertation title: Semantic Representation Learning for Discourse Processing

Yi Yang Computer Science

Fall 2013 – Fall 2016; was previously a student of Calton Pu in the CS Doctoral Program

Senior Research Scientist at ASAPP

Dissertation title: Robust Adaptation of Natural Language Processing for Language Variation

Umashanthi Pavalanathan Computer Science

Fall 2013 – August 2018

Data Scientist at Twitter

Dissertation title: Computational Approaches to Understanding Stylistic Variation in Online Writing

B.1.b In Process

Sandeep Soni Computer Science

Fall 2015 – present

Passed qualifier in Spring 2017

Research topic: Modeling sociolinguistic influence

Jacob Eisenstein Page 15 of 23

Ian Stewart Human-Centered Computing

Fall 2015 – present

Passed qualifier in Spring 2017

Research topic: Orthographic variation as a sociolinguistic variable

Yuval Pinter Computer Science

Fall 2016 – present

Passed qualifier in Fall 2018

Research topic: Neural probabilistic models of lexical semantics and morphology

Sarah Wiegreffe Computer Science

Fall 2017 – present

Research topic: Deep learning for analysis of electronic health records

B.2. M.S. Students

Taha Merghani MS in Computer Science

Fall 2017 – Spring 2018

Project: Social network homophily in natural language processing

James Mullenbach MS in Computer Science

Spring 2017 – Spring 2018

Project: Predicting diagnosis codes from the text of electronic health records

Zhewei Sun MS in Computer Science

Fall 2017 – Spring 2018

Project: *Discourse-driven machine translation*Now a PhD student at the University of Toronto

Murali Raghu Babu MS in Computer Science

Fall 2017 – Spring 2018

Project: Social network homophily in natural language processing

Now a software engineer at Google

Karishma Malkan MS in Computer Science

Summer 2016

Project: Neural Turing machines for discourse parsing

Now a machine learning scientist at Amazon

Akanksha MS in Computer Science

Spring 2016

Project: Discourse parsing with Bayesian optimization

Now a software engineer at Amazon

Rahul Goel MS in Computer Science

Fall 2015 – Spring 2016

Project: Modeling language evolution in social media

Now a software engineer at Amazon

Naman Goyal MS in Computer Science

Spring 2015 – Spring 2016

Project: Modeling language evolution in social media; discourse parsing from distant supervision

Now a software engineer at Yelp

Jacob Eisenstein Page 16 of 23

Parminder Bhatia MS in Computer Science

Spring 2015 – Fall 2016

Project: Discourse parsing for the analysis of document-level sentiment; subword modeling for

word representations Now a research scientist at Amazon, previously research software engineer at Yik Yak

Gongbo Zhang MS in Computer Science

Fall 2014 – January 2015

Project: *Discourse parsing from distant supervision* Now a PhD student at the University of Delaware

Vinodh Krishnan MS in Computer Science

Spring 2014 – Spring 2015

Project: Inducing signed social networks from dialogue

Now a software engineer at Google

Ivan Sysoev MS in Computer Science

Spring 2014

Project: Semantic dependency parsing Now a PhD student in the MIT MediaLab

Rakshit Trivedi MS in Computer Science

Spring 2013

Project: Discourse connectives in sentiment analysis

Now a PhD student at Georgia Tech

Sandeep Soni MS in Computer Science

Fall 2012 – Spring 2014

Project: Uncertainty and bias in attributed quotes

Subsequently a software engineer at Yahoo!, now a PhD student at Georgia Tech

Arindam Das MS in Computer Science

Fall 2012

Project: Social media variation in social networks

Sahil Patwardhan MS in Computer Science

Fall 2012

Project: Automatic summarization of Twitter feeds

Neha Gupta MS in Computer Science

Spring 2012

Project: Analyzing political blogs for polarity in thread structure

B.3. Undergraduate Students

Marc Marone Bachelors in Computer Science

Fall 2017 – present

Project: Discourse-driven machine translation, character-level modeling

Winner of the President's Undergraduate Research Award (PURA) in Fall 2018

Jay Devanathan Bachelors in Computer Science

Fall 2017 – Spring 2018

Project: Discourse-driven machine translation

Xiaochuang Han Bachelors in Computer Science

Fall 2017 – Spring 2018

Project: Stance and style matching in online social media

Jacob Eisenstein Page 17 of 23

Robert Guthrie Bachelors in Computer Science

Spring 2016 – Spring 2017

Project: Word embeddings as latent variables

Patrick Violette Bachelors in Computer Science

Fall 2015 – Spring 2016

Project: Tracking evolving stories in social media.

Yijie Wang Bachelors in Computer Science

Spring 2015 – Spring 2016

Project: Representation learning for semantic dependency parsing.

Ana L. Smith Bachelors in Computer Science

Fall 2013 – Spring 2015

Project: Resolving ambiguous toponyms in social media text.

Winner of the President's Undergraduate Research Award (PURA) in Fall 2014. Now a PhD student at Cornell University.

Naomi Robert Bachelors in Computer Science

Fall 2012

Project: Visualizing geographical language variation

B.4. Service on thesis or dissertation committees

B.4.a Internal

Shanmukha Ramak Vedantam Computer Science, Georgia Institute of Technology, Fall 2018.

Thesis Title: Interpretation, Grounding, and Imagination for Machine Intelligence

Principal Advisor: Devi Parikh

Edward Choi Computational Science and Engineering, Georgia Institute of Technology, April 2018.

Thesis Title: Doctor AI: Interpretable Deep Learning for Modeling Electronic Health Records

Principal Advisor: Jimeng Sun

Tanushree Mitra Computer Science, Georgia Institute of Technology, April 2017.

Thesis Title: Understanding Social Media Credibility

Principal Advisor: Eric Gilbert Assistant Professor at Virginia Tech

Seungyeon Kim Computer Science, Georgia Institute of Technology, Summer 2015.

Thesis Title: Novel Document Representations based on Labels and Sequential Information

Principal Advisor: Guy Lebanon

Boyang "Albert" Li Computer Science, Georgia Institute of Technology, Fall 2014.

Thesis Title: Learning Domain-Independent Narrative Intelligence

Principal Advisor: Mark Riedl

Research scientist at Disney Research

Ke Zhou Computer Science, Georgia Institute of Technology, August 2013.

Thesis Title: Extending Low-Rank Matrix Factorizations for Emerging Applications

Principal Advisor: Hongyuan Zha

Jacob Eisenstein Page 18 of 23

B.4.b External

J. Jessy Li Computer and Information Science, University of Pennsylvania., May 2017.

Thesis Title: From discourse structure to text specificity: Studies of coherence preferences

Principal Advisor: Ani Nenkova

Assistant Professor at the University of Texas-Austin

Dong Nguyen Computer Science, University of Twente, March 2017.

Thesis Title: Text as Social and Cultural Data: A Computational Perspective on Variation in Text

Principal Advisor: Franciska de Jong, Mariet Theune, and Antal van den Bosch

Postdoctoral research fellow at the Alan Turing Institute

Yulia Tsvetkov School of Computer Science, Carnegie Mellon University., August 2016.

Thesis Title: Cross-lingual transfer of linguistic and metalinguistic knowledge via lexical borrow-

ing

Principal Advisor: Chris Dyer

Assistant Professor at Carnegie Mellon University

Baekkwan Park Political Science, Emory University, Summer 2015.

Thesis Title: The Politics of Naming and Shaming

Principal Advisor: Jeffrey Staton

Senior Research Officer at the Human Rights Center of the University of Essex

David Bamman School of Computer Science, Carnegie Mellon University., Summer 2015.

Thesis Title: People-Centric Natural Language Processing

Principal Advisor: Noah A. Smith

Assistant Professor at the University of California, Berkeley

Qiaoling Liu Computer Science, Emory University, Expected Fall 2014.

Thesis Title: Improving Query Understanding and Search Quality with Community Question An-

swering Data

Principal Advisor: Eugene Agichtein

Bo Han Computer Science, University of Melbourne, Summer 2014.

Thesis Title: Improving the Utility of Social Media with Natural Language Processing

Principal Advisor: Timothy Baldwin
Postdoctoral researcher at IBM Research

B.5. Mentorship of visiting scholars

Dong Nguyen PhD Student, University of Twente, Netherlands

Fall 2015

Project: Linking language variation in social media and speech

Now postdoctoral research fellow at the Alan Turing Institute

Caglar Tirkaz Fulbright Scholar; PhD Student, Sabanci University, Turkey

Fall 2012-Spring 2013

Project: Identifying visual attributes from natural language descriptions of visual objects

Now research scientist at Amazon

C. Other Teaching Activities

C.1. Curriculum Development

CS 8803-CSS Computational Social Science: I created a new course on computational social science, which combines techniques from computational data analysis with traditional social science. The course includes

Jacob Eisenstein Page 19 of 23

a methodological focus on network analysis and text mining, and briefly treats other methodologies such as time series analysis and causal inference. Students engage with applications of these techniques to political science, sociology, linguistics, economics, and psychology. Foundational readings are paired with recent papers from the research literature in this rapidly-evolving cross-disciplinary field.

C.2. Course improvement

CS 4650/7650 Natural Language I completely redesigned Georgia Tech's course on natural language processing. Substantively, core concepts now include machine learning for language processing, linguistic foundations and their computational representations, and the design of efficient algorithms for predicting and learning linguistic structures. Pedagogically, the course now features rigorous problem sets that help students build a powerful toolset in text mining and linguistic analysis. We begin with basic classifiers (including sentiment analysis), and move to structured prediction (part-of-speech tagging and parsing), concluding with unsupervised techniques for measuring distributional similarity between words. To develop a basic understanding of linguistics, the course includes several short homework assignments that are designed to provide practical reinforcement for the reading and lectures. From 2012-2014, the course had an independent project in which students often attack cutting-edge research problems; one such project resulted in a short paper at NAACL (Trivedi and Eisenstein, 2013), one of the most prestigious NLP conferences. In 2012, the course was added to the elective list for the MSCS specialization in Machine Learning. In Spring 2013, CS 4650 was added as a pick to the Intelligence thread by the UCC. As the course became larger, the independent final project was replaced with an exam.

CS 4464/6465 Computational Journalism In Spring 2016, I taught Computational Journalism for the first time. The course had previously emphasized multimedia, but there was a rising tide of interest in *data journalism*, in which statistics and machine learning are used to produce news stories and to analyze the news. I therefore re-oriented the course towards these trends, while maintaining the course's unique blend of computation and substantive journalism. Specifically, I introduced units on machine learning classification, sentiment analysis, geographic information systems, and topic models. Students then built on these ideas in their independent projects.

C.3. Other Teaching Activities: Ph.D. Qualifier Committees

Sindhu Ernala Social Computing Qualifier, Georgia Institute of Technology, Computer Science Ph.D., Spring 2018.

Principal Advisor: Munmun De Choudhury.

Koustuv Saha Social Computing Qualifier, Georgia Institute of Technology, Computer Science Ph.D., Spring 2018.

Principal Advisor: Munmun De Choudhury.

Shagun Jhaver Social Computing Qualifier, Georgia Institute of Technology, Computer Science Ph.D., Spring 2017.

Principal Advisor: Eric Gilbert.

Eshwar Chandrasekharan Social Computing Qualifier, Georgia Institute of Technology, Computer Science Ph.D., Spring 2017.

Principal Advisor: Eric Gilbert.

Lara Martin Human-Centered Computing Qualifier, Georgia Institute of Technology, Human Centered Computing Ph.D., Spring 2017.

Principal Advisor: Mark Riedl.

Stevie Chancellor Human-Centered Computing Qualifier, Georgia Institute of Technology, Human Centered Computing Ph.D., Spring 2015.

Principal Advisor: Munmun De Choudhury.

Jacob Eisenstein Page 20 of 23

Michael Pettinati Intelligent Systems Qualifier, Georgia Institute of Technology Computer Science Ph.D., Spring 2015.

Principal Advisor: Ron Arkin.

Unaiza Ahsan Intelligent Systems Qualifier, Georgia Institute of Technology Computer Science Ph.D., Spring 2015.

Principal Advisor: Irfan Essa.

Daniel Kohlsdorf Machine Learning Qualifier, Georgia Institute of Technology Computer Science Ph.D., Spring 2014.

Principal Advisor: Thad Starner.

Tanushree Mitra Social Computing Qualifier, Georgia Institute of Technology Computer Science Ph.D., Spring 2013.

Principal Advisor: Eric Gilbert.

VI. Service

A. Professional Activities

A.1. Editorial Board Memberships

- A.1.1 Language Variation Studies, Language Science Press. 2014-present
- A.1.2 Linguistic Issues in Language Technology, CSLI. 2014-present
- A.1.3 Computational Linguistics, MIT Press, 2017–present

A.2. Society Offices, Activities, and Memberships

A.2.1 Member, Association for Computational Linguistics (ACL)

A.3. Organization and Chairmanship of Technical Sessions, Workshops and Conferences

- A.3.1 Co-chair and Co-founder, Atlanta Workshop on Computational Social Science, 2013-2015.
- A.3.2 **Faculty advisor**, Student Research Workshop, North American Association for Computational Linguistics (NAACL), 2016.
- A.3.3 **Co-Chair**, Workshop on Language Technology for Computational Social Science, Association for Computational Linguistics (ACL), 2014; Workshop on Computational Social Science and Natural Language Processing, Empirical Methods in Natural Language Processing (EMNLP), 2016.
- A.3.4 Student award coordinator, International Conference on Machine Learning (ICML), 2013.
- A.3.5 **Student volunteer coordinator**, North American Association for Computational Linguistics (NAACL), 2013.
- A.3.6 **Tutorial Chair**, North American Association for Computational Linguistics (NAACL), 2012; Association for Computational Linguistics (ACL), 2018.
- A.3.7 Senior Area Chair, Association for Computational Linguistics (ACL), 2019.
- A.3.8 **Area Chair**, North American Association for Computational Linguistics (NAACL), 2018; Empirical Methods in Natural Language Processing (EMNLP), 2017; North American Association for Computational Linguistics (NAACL), 2016; Association for Computational Linguistics (ACL), 2014; European Association for Computational Linguistics (EACL), 2014.

Jacob Eisenstein Page 21 of 23

A.4. Technical Journal or Conference Referee Activities

- A.4.1 **Book reviewer**: Morgan Claypool Synthesis Lectures on Human Language Technologies (2015, 2019).
- A.4.2 **Journal reviewer**: Computational Linguistics (2013-2016); Transactions of the Association for Computational Linguistics (2012-present); Communications of the ACM (2013), Language in Society (2013, 2018); IEEE/ACM Transactions on Audio, Speech, and Language Processing (2013); ACM Transactions on Intelligent Systems and Technology (2013); Journal of Artificial Intelligence Research (2016); Journal of Sociolinguistics (2018-2019).
- A.4.3 Senior Program Committee: International Conference on Web and Social Media (ICWSM), 2014.
- A.4.4 Program Committee: World Wide Web (WWW) conference, 2012, 2014; International Conference on Machine Learning (ICML), 2010, 2012-2017; Conference on Natural Language Learning (CoNLL), 2009, 2011, 2013, 2016, 2017; Artificial Intelligence and Statistics (AISTATS), 2013; North American Association for Computational Linguistics (NAACL), 2012, 2013, 2015, 2019; Association for Computational Linguistics (ACL), 2009, 2012, 2015-2018; International Conference on Computational Linguistics (COLING), 2010, 2012; Empirical Methods in Natural Language Processing (EMNLP), 2010-2012, 2014-2018; European Association for Computational Linguistics, 2012, 2016; Knowledge Discovery and Data Mining (KDD), 2011; SIGDial meeting on Discourse and Dialogue, 2016; Joint Conference on Lexical and Computational Semantics (*SEM), 2016.
- A.4.5 Reviewer: Society for Computation in Linguistics (SCiL), 2019; Computer-Supported Cooperative Work (CSCW), 2018; Neural Information Processing Systems (NIPS), 2011, 2013-2017; International Joint Conference on Natural Language Processing (IJCNLP), 2011; SIGGRAPH, 2010; Workshop on Language Technology for Cultural Heritage, Social Sciences, and Humanities, 2016-present; International Conference on Learning Representations (ICLR), 2015-2016.

A.5. Proposal Panels and Reviews

- A.5.1 Reviewer and Panelist, National Science Foundation, Directorate for Computer and Information Science and Engineering, 2012, 2014-2017; Directorate for Social, Behavioral, and Economic Sciences, 2016-2017.
- A.5.2 Reviewer, Defense Threat Reduction Agency, Fall 2015.
- A.5.3 Reviewer, Air Force Office of Scientific Research: Fall 2014, Spring 2017.
- A.5.4 Reviewer, Army Research Office, Summer 2014.

B. Public and Community Service

- Symposium organizer and moderator, Annual Meeting of the American Association for the Advancement of Science (AAAS), "The linguistics of status, influence, and innovation: a computational perspective." February 2015.
- Participated in the CS10K Community Event on *Teaching Data*, a discussion on big data for high school teachers, in Fall 2013.

C. Institute Contributions

C.1. Institute Committee Service

C.1.1 Tech Fee committee, 2016-2017

Jacob Eisenstein Page 22 of 23
